Madiun, Indonesia | bimaandrian73@gmail.com | +62 89603029740

I'm a 24-year-old Mobile Developer with over 3 years of experience specializing in Flutter. I primarily use GetX for state management but remain adaptable to other approaches when required. Beyond mobile development, I'm skilled and passionate about UI/UX design and have both experience and interest in exploring machine learning projects. Frequently recognized by peers for my strong work ethic, I'm dedicated to delivering high-quality results and contributing effectively to help your company achieve its goals.

Work Experience

Mobile Developer
10/2023 - Present

AyoSatu | PT. Rahadhyan Integrasi Nusantara / Bandung, Jawa Barat

- Contribute to develop and maintenance product mobile apps with flutter framework.
- Implement responsive and user-friendly UI designs, ensuring smooth user experiences across Android and iOS platforms.

- Utilize state management techniques such as GetX to ensure scalability and maintainability of applications.
- Integrate RESTful APIs, Firebase services, and third-party libraries as needed.

Mobile Developer
10/2022 - 10/2023

VocaGame | PT. Bermain Bersama Indonesia / Surabaya, Jawa Timur

- Contribute to develop and maintenance product mobile apps with flutter framework.
- Implement responsive and user-friendly UI designs, ensuring smooth user experiences across Android and iOS platforms.
- Collaborate with cross-functional teams, including backend developers and UI/UX designers, to deliver high-quality mobile solutions.
- Utilize state management techniques such as GetX to ensure scalability and maintainability of applications.
- Integrate RESTful APIs, Firebase services, and third-party libraries as needed.

Mobile Developer (Internship)
07/2022 - 10/2022

Widya Wicara | PT. Widya Informasi Nusantara / Sleman, Yogyakarta

- Contribute to develop and maintenance product mobile apps with flutter framework.
- Implement responsive and user-friendly UI designs, ensuring smooth user experiences across Android and iOS platforms.
- Collaborate with cross-functional teams, including backend developers and UI/UX designers, to deliver high-quality mobile solutions.
- Utilize state management techniques such as GetX to ensure scalability and maintainability of applications.
- Integrate RESTful APIs, Firebase services, and third-party libraries as needed.

Mobile Developer
01/2022 - 09/2022

Madjou | PT. Madjou Jaya Indonesia / Madiun, Jawa Timur

- Contribute to develop and maintenance product mobile apps with flutter framework.
- Implement responsive and user-friendly UI designs, ensuring smooth user experiences across Android and iOS platforms.
- Collaborate with cross-functional teams, including backend developers and UI/UX designers, to deliver high-quality mobile solutions.
- Utilize state management techniques such as GetX to ensure scalability and maintainability of applications.
- Integrate RESTful APIs, Firebase services, and third-party libraries as needed.

Mobile Developer (internship)

Widya Skilloka | PT. Widya Indonesia Sejahtera / Sleman, Yogyakarta

06/2021 - 12/2021

- Contribute to develop and maintenance product mobile apps with flutter framework.
- Implement responsive and user-friendly UI designs, ensuring smooth user experiences across Android and iOS platforms.
- Collaborate with cross-functional teams, including backend developers and UI/UX designers, to deliver high-quality mobile solutions.
- Utilize state management techniques such as GetX to ensure scalability and maintainability of applications.
- Integrate RESTful APIs, Firebase services, and third-party libraries as needed.

Education

Bachelor's Degree of Informatics Engineering

Electronic Engineering Polytechnic Institute of Surabaya

08/2024 - 04/2026

Associate Degree of Information Technology

Madiun State Polytechnic

06/2019 - 08/2022

Technical Skills

Mobile Development

- Flutter, Dart, Kotlin (basic), Swift (basic)
- State Management: GetX, Provider, BLoC
- RESTful API Integration, Firebase, SQLite, Hive, WebSocket, Supabase

UI/UX Design

- Figma, Flutter UI Design, Responsive Layouts
- User Flow & Wireframing, Prototyping

Version Control

- Git, GitHub, GitLab

Backend & Cloud (Basic):

- Firebase Authentication, Cloud Firestore, Realtime Database

Machine Learning (Exploratory)

- TensorFlow Lite Integration, Python (NumPy, Pandas, scikit-learn)

Tools & Environment

- Android Studio, VS Code, XCode, Postman, Jira, Notion, Github Desktop
